Data Volume Management & ILM Services

Strategic Data Volume Optimization for Modern Enterprises

As organizations navigate the explosive growth of enterprise data-fueled by AI, analytics, cloud, and mobile-many are discovering the critical need to rethink how their SAP data is stored, governed, and streamlined. M10TEK's Data Volume Management (DVM) and Information Lifecycle Management (ILM) services provide a holistic, scalable framework to reduce costs, improve compliance, and accelerate transformation.

Why DVM Matters

Data bloat leads to:

- Increased cloud & hardware costs
- Elevated regulatory and audit risk
- Slower system performance
- Longer migration timelines

SAP projects enterprise data to grow by 23% annually. A proactive approach to DVM and ILM helps organizations gain a lasting competitive edge.

What M10TEK Delivers

Our DVM Assessment includes:

- Analysis of system landscape and historical data volumes
- Identification of redundant, obsolete, and trivial (ROT) data
- Tailored archiving strategy aligned with compliance
- Integration of DVM with your S/4HANA or SAP RISE roadmap
- Recommendations for system decommissioning and data tiering

No-Cost, High-Impact Assessment

M10TEK offers a no-charge, innovative, and holistic Data Volume Assessment lasting 4-6 weeks (part-time) that delivers a multi-year roadmap tailored to your SAP landscape. This low-disruption engagement requires minimal time from business stakeholders and spans nine core domains:

- ILM Retention Management
- Classical Archiving
- Legacy System Retirement
- Native Storage Extension for S/4HANA
- Cloud Storage Strategy
- M&A Carve-Out Planning
- Regulatory Compliance (PII, GDPR, CCPA, etc.)
- Hybrid Archiving for Rapid Growth Scenarios
- Structured Roadmap for Data Volume Control

The roadmap is valuable whether you're still on ECC, preparing for S/4HANA, managing system decommissioning, or seeking better control of your S/4 appliance size. Please contact us to explore how M10TEK can help you take the next step.

Data Volume Management & ILM Services

Proven Methodology & 360° Approach

- In-Depth Analysis
- Actionable Planning
- Integrated Execution
- Future-Ready Architecture

M10TEK ensures successful ILM/DVM deployment aligned with enterprise goals.

Customer Success Highlights

- 4x reduction in HANA appliance size
- Single-weekend S/4 conversions
- Decommissioned legacy systems
- Multi-phase, non-disruptive execution

Value for SAP RISE and S/4HANA

- Reduces RISE container size and migration cost
- Builds clean foundation for cloud transformation
- Minimizes burden on SAP sales and delivery teams

Partner with the Experts

With decades of SAP experience and a trusted delivery record, M10TEK offers a reliable, repeatable, and value-driven DVM service model.
