

SAP Testing Services & Assessment Overview

SAP S/4HANA Testing Services

Ensure Stability, Quality, and Performance with M10TEK's Expert Testing Solutions. Whether you're undergoing a greenfield S/4HANA implementation, a brownfield system conversion, or ongoing enhancement and support, rigorous SAP testing is essential to business continuity. M10TEK delivers end-to-end testing strategies for SAP S/4HANA and ECC systems across industries, helping clients avoid cost overruns, system downtime, and compliance risks.

Core Testing Capabilities

- Functional Testing (FI, SD, MM, PP, HR, etc.)
- Integration & Interface Testing
- Regression Testing (with automation)
- User Acceptance Testing (UAT)
- Performance & Load Testing
- Security & Authorization Testing
- Continuous Testing for agile environments

Testing as a Service (TaaS)

M10TEK provides Testing-as-a-Service (TaaS) to enable scalable, repeatable testing. Our Testing Center of Excellence supports everything from automation frameworks to test data management and defect resolution.

Tool Expertise

We support Tricentis Tosca, Q-Test, SAP CBTA, Panaya, Worksoft, and more. Our services integrate with CI/CD and DevOps pipelines, enabling shift-left QA and continuous delivery.

Testing Discovery Questionnaire Overview

M10TEK conducts a comprehensive, no-cost testing assessment to evaluate quality assurance maturity and identify optimization opportunities. This structured discovery spans **four key areas** and enables tailored test strategy recommendations:

1 Core Discovery Highlights

- Why are they evaluating, why now, & why them?
- What is your current Quality Engineering strategy?
- How does the team handle E2E business process testing currently?
- What's working well?
- What challenges persist within this?

SAP Testing Services & Assessment Overview

2 DI Discovery Highlights

- Pain points
- Why are looking into a solution?
- Bad data quality?
- Testing takes too long?
- Only manual testing?

3 Account Tool Stack Highlights

4 DI Discovery Highlights

- What is your current SAP Environment?
- If not on S4, when do you plan to upgrade?
- SAP Software Location? (Ex. On Prem, Cloud hosted by SAP/Other Provider, Hybrid)
- What other SAP Applications do you have? (Ex, CRM, Hybris, Concur, Ariba, SuccessFactors, Other?)
- Are you using SQL/Oracle/DB2 database?

Partner with M10TEK for Quality-Driven SAP Testing

Our team brings proven tools, certified consultants, and real-world testing frameworks to ensure your SAP landscape is reliable, compliant, and performance-optimized. From early project planning through post-go-live support, M10TEK delivers risk-free transformation with scalable Testing-as-a-Service (TaaS) models.

Whether you're preparing for a new SAP S/4HANA implementation, an upgrade, or ongoing enhancements-our no-cost assessment is the best place to start.
